COMMENTAIRES

Guillaume has a very strong base in English and is able to express himself easily and correctly on a range of topics, whether they be in the past, present, future, or pertaining to current, ongoing or hypothetical situations. He did make several prepositions errors, and some imprecisions or errors in vocabulary, but these were often more complex errors, and

did not impact his meaning very much. Guillaume would very likely be at ease performing tasks, conversing with clients or reporting and presenting in English. He would potentially be limited in situations requiring high grammatical accuracy, or requiring more complex expressions (had better, ought to).
